Cloud teaching with wiki and boardcasting (Wikimania 2014 <http://wikimania2014.wikimedia.org/wiki/Submission>)

M-Learning in the scientific and educational environment of a university (The Emissia.Offline Letters, 2013, <http://www.emissia.org/offline/2013/2014.htm>)

How do I teach Javascript?

(What's [boardcasting](#)?)

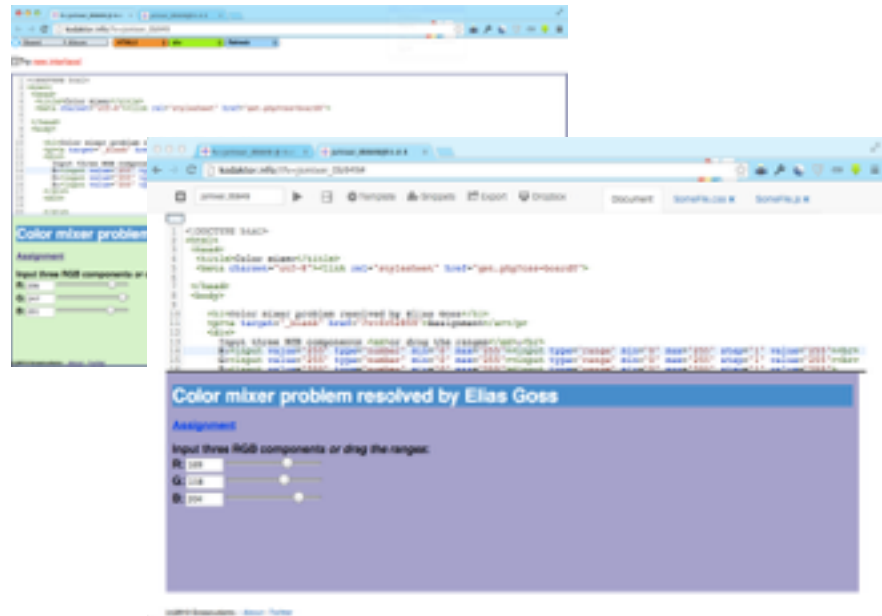

The routine is simple. I prepare a 'board' like

<http://kodaktor.info/jsmixer>

with some basic code and an assignment integrated into it. The students 'receive' the 'board' and create their own boards like

http://kodaktor.info/?v=jsmixer_0b949

then they tweet those links or send them over email or cloud documents. That's how their portfolios are being formed.

Miscellaneous

Among primary favorites: ecology and environmentalism, buddhist philosophy, history of languages, entomology.

Participated in start-up projects, involving geopositioning (MB-Guide), keeping in touch with web-developers (<http://goss.habrahabr.ru>) and arranging webinars for teachers of Russia in the field of cloud technologies and E-Learning.

Supervised students who have been developing web-based information systems for schools:

Pavel Aksutin (<http://proffnavigator.ru>)

Nick Juckov (<http://embit.ru>)
